

CIDC

Construction Entrepreneur Development Programme

Construction Industry Development Council (CIDC)
Established by
The Planning Commission (Government of India) and the
Construction Industry

About CIDC

The Construction Industry Development Council was established in 1996 by the Planning Commission, Government of India along with Construction Industry, to shape up the Indian Construction Industry. CIDC has amongst its 89 members from various Ministries, Government Department, PSUs, Construction Companies, Financial Institutions, Educational and R&D Institutions. During this period CIDC has taken up several important projects related to the issues, vital to the Construction Industry.

About CED Programme

Problems of rising costs, shortage of professional contracting service providers and the resulting difficulties in maintaining standards of workmanship are vitally affecting the construction industry at this point in time. Considerable gains in productivity and standards of achievement can be obtained from improved attention of construction contract service providers in above matters. **Construction Entrepreneur Development Programme** deals with entrepreneurial functions required for construction works.

For a successful completion, construction projects require a host of entrepreneurial competencies, those which can assist the main contractor or the project owner in construction activities. Such competencies are aimed to be cultivated in construction entrepreneur developed under this programme. These persons should be knowledgeable of the essentials of a specific activity or a group of activities and can control the execution activities in an optimum manner with lesser errors and better outputs.

They should be able to translate the planned project or the specific work components from drawing board to ground, and address the jobsite safety issues while supervising the works efficiently. Knowledge base of such persons should permit them to identify any incorrect technical decision or action or inappropriate material so that proper work in accordance with the specifications could be executed.

The programme aims to develop such cadre with fifteen different specializations required for successful project supervision.

Programme Details

The programme is designed for Industry entrants and working professionals desirous of enhancing their proficiencies through structured training. It is built on a modular system to be delivered through contact classes and hands-on practice.

Based on the construction work requirements fifteen different proficiencies have been identified in the programme as hereafter:
